FOR STUDENTS WHO CONTINUE
TO COMPLETE CHEMISTRY PHD'S

RIGOROUS. PERSONAL. NATIONALLY RECOGNIZED.

WHAT MAKES THIS PROGRAM SPECIAL?

You'll get real lab experience, strong mentorship, and the chance to do meaningful research. It's a powerhouse program with the personal support of a small school.

According to NSF CASPAR data, Truman Chemistry ranked 17th nationwide (2017–2022) for programs producing graduates who go on to earn PhDs in chemistry-based fields—the highest ranked public undergraduate-only program in the country.

You don't have to have your path figured out. This program gives you space to explore your interests while building the foundation for a future in science, healthcare, or beyond.

AFTER GRADUATION:

Our grads thrive in graduate and professional schools, industry roles, teaching, and research labs. Employers and admissions committees know the value of a Truman Chemistry degree.
