

BS Biochemistry & Molecular Biology (BCMB)

MAJOR: BIOCHEMISTRY & MOLECULAR BIOLOGY (BACHELOR OF SCIENCE)

At Truman, you won't just study science; you'll do it. Side-by-side with faculty, you'll explore life at the molecular level while building the personal and technical skills that matter in today's world.

**LAUNCHES
CAREERS IN
RESEARCH &
HEALTHCARE**

**WHERE
CHEMISTRY
& BIOLOGY
CONNECT**

PREPARES YOU FOR **IMMEDIATE EMPLOYMENT,
MEDICAL SCHOOL OR GRADUATE STUDY**

HANDS- ON. INTERDISCIPLINARY. IMPACTFUL.

WHAT MAKES THIS PROGRAM SPECIAL?

You don't need to have it all figured out. This program gives you room to explore, grow, and shift your path, all while gaining the experience and confidence to move forward.

Whether you're dreaming of med school or curious where science might lead you, BCMB gives you the tools, mentorship, and flexibility to explore and excel.

You'll graduate with the skills to lead in research, medicine, education, and more. Our collaborative, hands-on environment helps you build problem-solving, communication, and critical thinking skills that employers and grad schools love.

AFTER GRADUATION:

Our grads are everywhere: labs, biotech firms, classrooms, clinics, and more. Many pursue medical school, graduate programs, or careers across healthcare, science, and education.
