

BS

# Environmental Science

**MAJOR: ENVIRONMENTAL SCIENCE (BACHELOR OF SCIENCE)**

**MINORS OFFERED:** Environmental Studies

Environmental Science is for students who are drawn to biology or agricultural science, but also have an interest in applying those subjects towards solving challenges associated with human activity and development.

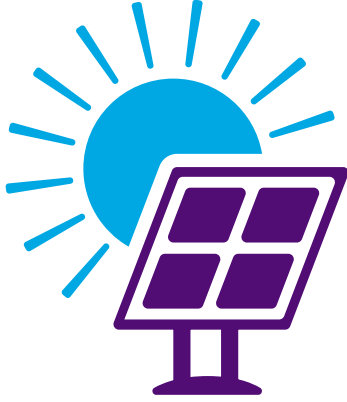

READY ACCESS TO OUR 400+ ACRE UNIVERSITY FARM

NEW PROGRAM OFFERING NUMEROUS OPPORTUNITIES FOR ENGAGEMENT AND RESEARCH INCLUDING SOLAR AND WIND

Local access to the Missouri Department of Conservation and Thousand Hills State Park

Opportunities to connect with local government regarding Environmental Science projects

Whether you're interested in a career in land management, conservation or planning or have an interest in the intersection of science and society you will be equipped to communicate and share the science of the field with a variety of audiences.

## WHAT MAKES THIS PROGRAM SPECIAL?

The Environmental Science program is about evaluating the needs of multiple groups to establish strategies that work toward improving environmental conservation and management.

Pursue an Environmental Science degree in a unique setting surrounded by local and rural communities. Explore how they meet environmental challenges while acquiring greater technical skills that can be applied across a broad range of areas.

## AFTER GRADUATION:

Truman graduates find careers in a wide range of fields from environmental consulting, government agencies and city management and planning to environmental compliance and sustainability.
