

BA/BS Interdisciplinary Studies

When traditional majors and minors don't fit with your passions and designs for your future profession, a blend of two or more academic, scientific, or artistic disciplines may be your calling. This department allows students the chance to pull from multiple avenues of study in order to customize their degree to the fullest.

STUDENT-DESIGNED MAJORS

To apply for the Interdisciplinary Studies Major, students propose a plan for an individualized curriculum, to create a major that is right for them. The following list are just a few majors that have been designed by Truman students:

EXAMPLE MAJORS:

- Art Therapy
- Asian Studies
- Child Studies
- Computational Social Science
- Environmental Studies
- Film Studies
- Game Design
- Global Health Studies
- Healthcare Administration
- Legal Studies
- Neuroscience
- Public Administration
- Sustainability Studies
- and more!

WHY INTERDISCIPLINARY STUDIES?

Truman students are encouraged to pursue their passion and discover their distinction to their heart's content, and no other major on campus allows students this level of customization. Combine nearly any interests and goals to craft your unique studies and pursuits across academia.

STUDENT RESEARCH CONFERENCE

An interdisciplinary major at Truman allows you to dive into the topics that truly interest you, and can be a ideal catalyst for student research.

Each year, the Student Research Conference provides the opportunity to present your findings and interact with interested students, professors, and professionals in various fields.

STUDY ABROAD OPPORTUNITIES

With the flexibility of an interdisciplinary studies major, you can enhance your Truman experience in another country by incorporating language, history, and cross-cultural experiences into your curriculum. With programs of varying lengths, academic emphasis and location, there's a study abroad adventure for every student.

AFTER GRADUATION:

Students can pursue a wide variety of careers or graduate programs by customizing their degree to match their goals. Interdisciplinary Studies graduates build on the foundation of the liberal arts, combining areas such as the arts, humanities, business, and science to develop broad knowledge and adaptable skills that prepare them for diverse and rewarding career paths.

You can also use internship experiences as a self-discovery tool to tweak your personalized program of study.
