

BA/BS Mathematics

MAJOR: MATHEMATICS (BACHELOR OF ARTS / SCIENCE)

MINORS OFFERED: Mathematics, Mathematical Biology, Actuarial Science

Mathematics is a powerful tool used in numerous career paths, and a fascinating field of study in its own right. Through a curriculum that is both rigorous and flexible, our majors gain an appreciation for the structural beauty of Mathematics, sharpen their critical thinking and problem solving skills, and develop quantitative skills that prepare them for a variety of careers after college.

DOUBLE MAJORS

Mathematics is essential to many disciplines. Math majors often get double majors in fields such as:

- Computer Science
- Physics
- Statistics
- Data Science
- Economics
- Business Administration
- Psychology

AFTER GRADUATION:

Truman Mathematics majors find work as teachers, actuaries, and in a variety of careers in business. Our majors are also well-prepared for graduate programs in Mathematics and related fields. Math majors can also pursue engineering in dual degree programs available through partner schools such as:

- Washington University
- University of Missouri-Columbia
- Missouri University of Science and Technology

STUDYING MATHEMATICS AT TRUMAN

Mathematics majors at Truman have the opportunity to work on original research problems with faculty and present their findings either locally through a colloquium series, or more broadly at professional conferences.

Many Mathematics majors pursue impactful experiences beyond the curriculum, including internships, summer research programs, mathematics competitions, and modeling contests. Student organizations like Kappa Mu Epsilon, the Society of Actuaries, and Mathematics and Science Secondary Educators offer chances for networking to expand their horizons.
